

To whom it May Concern,

RE: Waterjet Technologies Australia – Hydro demolition and Concrete Remediation work.

I am writing to recommend the services of Waterjet Technologies Australia Pty Ltd.

Waterjet Technologies are successfully delivering a Portside Concrete Remediation Project comprising all aspects of principle Contractor Management, inclusive of access, site amenities and safety along with the technical self-performed delivery aspects of:

- Hydro-demolition
- Steel reinforcement protective coatings and re-augmentation where corrosion of in-situ bars necessitates
- Concrete Reinstatement – using both Gunite, flowable and hand placed concrete repairs
- Installation of associated Cathodic Protection via the inclusion of sacrificial anodes within the scope of works.

Waterjet Technologies are a technically competent, professional, and pragmatic Contractor with an exceptionally experienced team of Managers, Supervisors and Applicators.

Waterjet Technologies are an effective Full-Service contracting provider and, in conjunction with their nominated suppliers, have provided theoretical and practical guidance to the Project Team throughout the delivery of the Project.

Waterjet Technologies have provided a comprehensive Quality Assurance Package for all field applications, and consistently deliver a high standard of workmanship, earning the confidence and trust of the Port of Portland.

Waterjet Technologies are delivering the Project safely and without incident, completing their scope within an operational Port and a tight construction program.

As such, Port of Portland has no hesitation in recommending Waterjet Technologies for Port rehabilitation projects.

Please feel free to contact me if you need to know further details.

Regards,

**Michael Carr** | Infrastructure Manager | Port of Portland Pty Limited
